DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 44-68 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 01 024852.
3. This patent document teaches process for treating organic materials with compounds that are seen to fall within the scope of those claimed, see page 3 of the translation. Formula IV is seen to have substituents that, when selected, can be the same as those claimed. One of ordinary skill would be motivated to select the claimed substituents given the suggestion to do so. As such, the claims are rendered prima facie obvious.
